

Session Title: Information Retrieval in Decentralized and/or Federated Systems

24 April 2025, 10:00 - 13:00

The ESPRESSO team [<https://espressoproject.org/>] invites everyone, from seasoned Information Retrieval (IR) practitioners to interested parties from closely or distantly related disciplines, to join our workshop at SoSy 2025.

This is an opportunity for practitioners from across the globe to meet face-to-face and learn how each other's work is contributing to the challenges that matter in our communities.

Increasingly, the international community of Solid practitioners is looking at how we can query pods, and how we can query and search pods while taking into account Solid's varying and dynamic access permissions. We expect that our workshop will be of particular interest to the wider Solid community, as well as to the wider IR community, including those working with more traditional centralized architectures.

This will be a hands-on session: if you have a project ready to demonstrate, demo it; if you have code you're still working on, talk us through it; if you have a high-level design, walk us through it. Tell us about the people your project is helping, has helped, or will help; and how.

Speakers

ESPRESSO Project

Dr Helen Oliver (organizer): Postdoctoral Research Fellow, Knowledge Lab, Birkbeck, University of London

Dr Mohammad Bahrani (organizer): Postdoctoral Research Fellow, Web and Internet Science Group, University of Southampton

Dr Mohamed Ragab (tbc): Postdoctoral Research Fellow, Web and Internet Science Group, University of Southampton

Prof Thanassis Tiropanis (tbc): Professor, Web and Internet Science Group, University of Southampton

Keynote Speakers

Prof Jon Crowcroft (online), Marconi Professor of Communications Systems, University of Cambridge

Mr Terry Lee (online), Technical Support Engineer, Dataswyft

Invited Speakers

Dr Beatriz Estevez, Postdoctoral Researcher in the KNoWS group at Ghent University - imec

Mr Jackson Morgan (online), CEO, SetMeld

Dr Ruben Taelman, Postdoctoral Researcher in Decentralized Web Querying, IDLab, Ghent University

Mr Jesse Wright, Doctoral Student, EWADA Project, Department of Computer Science, University of Oxford

Dr Rui Zhao, Postdoctoral Researcher, EWADA Project, Department of Computer Science, University of Oxford

Dr Esther De Loof, Business Developer & Operations Director SolidLab; IDLab, imec research group at Ghent University
